

PUSH UPS

(Ron Jones, MS, ACSM Health/Fitness Instructor, Corporate Wellcoach)

Note: This is simply a list of all the various push ups I have learned; there were so many that I couldn't remember them unless I made a comprehensive list. I hope my list helps you remember all the variations—so you can use them! For specific directions on how to perform each push up, please refer to my website.

Directions: After *Dynamic Warm-Up* (Level I) or *Movement Prep* (Level II), perform exercises as desired. Some of the push ups are easy and some are extremely difficult. *Pick a safe level*; never be unsafe or exceed your capacity to “control” your body! In addition to working arms, chest, and shoulders, *push ups are very core oriented*. “Core” is the trunk area from waist to chest, front, sides, and back—all the way around.

Body Weight Push-Ups:

- Modified Military (Wall>Table>Chair>Knees>Negative)
- Military
- Military Lateral Twist
- Narrow
- Wide
- Split
- Split Reptile Walk
- Tiger
- T-Stabilization
- T-Stabilization + Hyperextension
- T-Stabilization + Abduction
- 3-Point
